- Strength: High
- Durability: Long-lasting
- Resistance To Staining: High
- Layered Structure: Multilayered
- Highlight: dental layered zirconia crown,
dental lab layered zirconia crown,
dental lab dental zirconia crown and bridge

Product Description

Product Description:

Zirconia stain resistance is an important factor to consider when selecting a crown and bridge product. The Dental Zirconia Crown and Bridge is designed to withstand staining, providing patients with a long-lasting and aesthetically pleasing restoration. This is particularly important for patients who are concerned about the appearance of their teeth.

The high translucency of the Dental Zirconia Crown and Bridge is another key attribute. This feature allows the product to blend in seamlessly with a patient's natural teeth. The result is a restoration that looks and feels like a patient's real teeth. This is important for patients who want to maintain their natural appearance while receiving the benefits of a crown or bridge.

Biocompatibility is also an important factor to consider when selecting a dental restoration product. The Dental Zirconia Crown and Bridge is an excellent choice in this regard. The zirconia material used in this product is biocompatible, meaning that it is safe and well-tolerated by the human body. This is important for patients who want to avoid any potential adverse reactions to dental restoration materials.

The Dental Zirconia Crown and Bridge is highly customizable, making it an ideal choice for a range of dental restoration needs. Whether a patient needs a single crown or a full bridge, this product can be customized to meet their individual needs and preferences. This ensures that patients receive a restoration that is tailored to their specific situation, resulting in optimal outcomes.

In summary, the Dental Zirconia Crown and Bridge is an excellent choice for patients seeking a dental restoration product that is resistant to staining, highly translucent, biocompatible, and customizable. This product is designed to provide long-lasting, aesthetically pleasing results that look and feel like a patient's natural teeth. If you are looking for a high-quality dental restoration solution, the Dental Zirconia Crown and Bridge is an excellent choice.

Features:

Product Name: Dental Zirconia Crown And Bridge

Strength: High

Esthetics: Natural

Resistance To Staining: High (due to zirconia material, zirconia stain resistant)

Application: Dental Restoration

Material: Zirconia (known for its strength and zirconia stain resistance)

Technical Parameters:

Esthetics	Natural
Material	Zirconia
Size	Customizable
Resistance to Staining	High (zirconia stain resistant)
Strength	High
Layered Structure	Multilayered
Durability	Long-lasting
Resistance to Fracture	High
Application	Dental Restoration
Ease of Use	Easy

Applications:

The Dental Zirconia Crown and Bridge is easy to use, which makes it an ideal product for dental practitioners who want to save time and offer high-quality dental solutions to their patients. The product is also customizable, which means that it can be tailored to meet the specific needs of each patient.

One of the key features of the ADS Dental Zirconia Crown and Bridge is its high translucency. This feature ensures that the dental crowns and bridges are aesthetically pleasing and blend seamlessly with the natural teeth. The multilayered structure of the product also adds to its natural appearance.

The Dental Zirconia Crown and Bridge is suitable for various dental applications, including single crowns, multiple-unit bridges, and implant restorations. Its high resistance to zirconia stain is a key feature that makes it ideal for long-term use.

The product is perfect for patients who want a long-lasting dental solution that is easy to maintain. The Dental Zirconia Crown and Bridge requires minimal maintenance, which means that patients can enjoy their new smile for years to come.

In summary, the ADS Dental Zirconia Crown and Bridge is a high-quality dental product that is easy to use, customizable, and suitable for various dental applications. Its high resistance to zirconia stain, high translucency, and multilayered structure make it an ideal choice for patients who want a long-lasting and aesthetically pleasing dental solution.

Customization:

Our ADS Dental Zirconia Crown And Bridge product is fully customizable to meet your specific needs. Made from high-quality zirconia material, this product is designed to be strong and durable, ensuring a precise fit and easy use.

Our product is made in Shenzhen, China, ensuring top-quality manufacturing standards. The size of the crown and bridge is customizable to fit your unique dental needs, and the precise fit ensures comfort and functionality. The strength of the zirconia material ensures long-lasting performance, while the easy-to-use design makes it simple for dental professionals to work with.

Our zirconia stain-resistant technology ensures that your dental crowns and bridges maintain their natural appearance, even after extended use. Trust in our ADS Dental Zirconia Crown And Bridge product for a reliable, customizable, and high-performing solution to your dental needs.

Support and Services:

The Dental Zirconia Crown and Bridge product is made of high-quality zirconia material, which is biocompatible and safe for patients. It is designed to provide excellent aesthetic results and long-term durability for dental restorations. Our technical support team is available to assist with any questions or issues regarding the product's use and application. Additionally, we offer a range of services, including customization and design assistance, to ensure that our customers receive the best possible outcomes for their patients. Our commitment to quality extends to our post-sales support, which includes troubleshooting and repair services to ensure the continued success of our customers.
